Morley Senior High School

Academic Extension Programme
Expressions of Interest 2010

The extension programme will offer 30 students from Year 8, 9 and 10 an opportunity to develop new and exciting skills to assist them to reach their fullest potential. The selection process will be made from student application and nominations from teachers, parents and peers. There will be a selection process that will look at the merits of each student. There will be a total of 30 places for this year, but the number for each year group may vary.

The programme will run every Tuesday and Thursday morning from 8:30am to 9:30am and will be held in the upstairs computer lab in the Art Building. Student will not attend tutorials on these two mornings.

In the beginning the programme will develop learning skills and scaffolds. Students will also be encouraged to develop their own research project in the subject that they are interested in and seek a staff mentor to guide them in the best direction.

Students will be encouraged to participate in a wide range of competitions and to undertake special projects across the learning areas. They will also be encouraged to undertake special projects of interest as well. If there are special speakers, exhibitions and opportunities for students to further their exposure in any area, excursions will be organised so that they are able to see and hear guest speakers in areas that will extend the students. Students will given opportunities to have one on one mentoring while at school and will be expected to have their work displayed at appropriate forums.

If you are interested in your child being involved with this programme, please contact me early in 2010 for application forms, or for further information on 9376 5555.

Mr Peter Crayden
Academic Extension Coordinator
