The Morley SHS Automotive Pre-Apprenticeship!

Year 10 Parents and Students!
Automotive Trade Training is now available at Morley SHS!

AUR 20512 Certificate II in Automotive Servicing Technology

The Morley Automotive Trade Training program is a flexible learning program available every year and designed for students in Year 11 who want to gain direct entry into the world of work or training while still working towards their Secondary Graduation. The program is suitable for students:

- who have a passion and a commitment to the automotive industry and would like to work in, and are clearly directed towards, achieving this goal.
- who would like a quicker and more meaningful transition into either work or training.
- who would like a Pre-apprenticeship in addition to Secondary Graduation.

The Benefits

In the current employment climate, students undertaking a Certificate II in Automotive Servicing Technology will have the opportunity of making a successful transition into full time automotive apprenticeships, other traineeships, further TAFE training or full time employment. All students who successfully complete this national qualification will have their indentured period of an automotive apprenticeship reduced by 6 months.

The program involves 3 days’ equivalent of a school program, a day’s equivalent of trade training and one day a week in the workplace.

The School Program

The school-based program provides a good general education for students. It involves the study of eight courses of study over two years which will include:

- English
- Mathematics
- Two other complementary courses nominated by the school.

The above program is designed to enable the student to achieve Secondary Graduation (the Western Australian Certificate of Education) by the end of Year 12, if the courses are passed by the student.

The ‘Training’ Program

The training program is made up of:

- Automotive training in the Trade Training Centre
  - Certificate II in Automotive Servicing Technology
- Workplace Learning in the automotive field (1 full day per week)
